DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a method.

Group II, claim(s) 18-21, drawn to a device.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the optoelectronic device requires a light emitting layer and does not necessarily require the method steps including MBE deposition because method steps are not afforded patentable weight.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. The species listed below do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The species are as follows:

Group I:

Species 1, Claims 1-5, pertaining to a method including Al supplied at a first specific pressure;

Species 2, Claims 1-4, 6, pertaining to a method including Al supplied at a second specific pressure;

Species 3, Claims 1, 7-8, pertaining to a method including varying the supply rate of Ga and or Al to grow a second AlGa_N layer;

Species 4, Claims 1, 9-10, pertaining to a method including varying the supply rate of Ga and or Al to grow a third AlGa_N layer;

Species 5, Claims 1, 11-12,14 wherein the substrate is InGa_N;

Species 6, Claims 1, 13, wherein the substrate is a Ga_N layer;

Species 7, Claim 1, 15, wherein the method includes a doping step;

Species 8, Claims 1, wherein the Al mole fraction is in a specific range.

Group II;

Species 1, claim 18, pertaining to an AlGa_N layer;

Species 2, claim 19, pertaining to a AlGa_N multilayer;

Species 3, claim 20, pertaining to an optoelectronic device with an AlGa_N layer;

Species 4, claim 21, pertaining to an optoelectronic device with an AlGa_N multilayer.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
